Risk Factors & Disclaimer

Under this investment approach investments are made in the companies which are considered as momentum stocks. These type stocks perform generally with higher volatility. Further, in short term these stocks may under-perform considerably against the benchmark. Portfolio Turnover is generally high in this approach. Investing in securities involves certain risks and considerations associated generally with making investments in securities. The value of the portfolio investments may be affected generally by factors affecting financial markets, such as price and volume, volatility in interest rates, currency exchange rates, changes in regulatory and administrative policies of the Government or any other appropriate authority (including tax laws) or other political and economic developments. Consequently, there can be no assurance that the objective of the Portfolio would be achieved. The value of the portfolios may fluctuate and can go up or down. Prospective investors are advised to carefully review the Disclosure Document, Client Agreement, and other related documents carefully and in its entirety and consult their legal, tax and financial advisors to determine possible legal, tax and financial or any other consequences of investing under this Portfolio and to understand the risk factors, before making an investment decision. Please note that past performance of the financial products, instruments and the portfolio does not necessarily indicate the future prospects and performance thereof. Such past performance may or may not be sustained in future. Portfolio Manager's investment decisions may not be always profitable, as actual market movements may be at variance with anticipated trends. The investors are not being offered any guaranteed or assured returns. The PM may be engaged in buying/selling of such securities. Individual returns of Clients for a particular portfolio type may vary significantly from the data on performance of the portfolios as may be depicted by the Portfolio Manager from time to time. This is due to factors such as timing of entry and exit, timing of additional flows and redemptions, individual client mandates, specific portfolio construction characteristics or structural parameters, which may have a bearing on individual portfolio performance. No claims may be made or entertained for any variances between the performance depictions and individual portfolio performance. Neither NJ Asset Management Private Limited (the "Portfolio Manager" or "PM") nor its Directors or Employees shall be in any way liable for any variations noticed in the returns of individual portfolios. The Client shall not make any claim against the Portfolio Manager against any losses (notional or real) or against any loss of opportunity for gain under various PMS Products, on account of or arising out of such circumstance/ change in market condition or for any other reason which may specifically affect a particular sector or security.
